

STORM 10 UV LASER

Storm 10 UV Laser Marker is a world-class advanced ultraviolet laser unit, which developed by our experts and engineers. It adopts the US made high-speed scanner system and collaborated by our self-developed marking controlling software. This system is stable in operation, accurate in positioning and effective in process; module design, easy to assemble and maintain.

Application :

- Packaging industry (Pack Marking)
- PCB and Plastic Marking
- Metal engraving and Milling

EXCLUSIVE MASTER (M) SDN BHD

Complete Automation Solutions

STORM 10 UV LASER

Technical Data

Max. laser average power:	5W (10KHZ)
Wavelength:	355nm
Beam quality M ₂ :	≤ 5
Repeat frequency:	≤ 8-15kHz
Marking scope:	50mm x 50mm
Linear speed:	≤ 7000mm/s
Min. line width:	0.01mm
Repeat accuracy:	+/- 0.003mm
Input power:	2KW
Electrical source:	AC220V / 50Hz / 15A
Cooling system	Chiller
Complete system Dimensions:	680×760×1350mm
